<u>PURPOSE</u>: To ensure providers appropriately conduct a telemedicine consultation using the Cisco Jabber application with iPad device.

DEFINITIONS:

- 1. <u>Distant Site</u> Site where the physician providing services is located at the time the service is provided via audio/video telecommunications
- 2. Healthcare Professional RN, LCSW, PA, or APN must be with patient at all times
- 3. <u>Originating Site</u> location of the patient receiving services
- 4. <u>Presenter</u> Healthcare Professional that is at the originating site with the patient at the start of the telemedicine visit presents the patient to the physician who is at the distant site.
- 5. <u>Telehealth</u> use of telecommunication technologies for clinical care, patient teaching, home health, healthcare professional education, and other diverse aspects of a healthcare system.
- 6. <u>Telemedicine</u> practice of healthcare delivery, diagnosis, consultation, treatment, and the transfer of medical data through interactive audio, video, and data communications that occur in real-time and in the physical presence of the patient.

PROCEDURE:

	Activity / Task	Task Time	What It Looks Like
1	Once logged in to your SIH Windows		
	based laptop or desktop device, open		
	the Jabber application.		
	You will not have to log in twice. Your		
	jabber phone account is enabled with		
	your active directory account upon		
	logging in to your computer.
