

EMSPPEexchange.2020.03.24

PPE exchange process for EMS personnel

1. Ambulance crew transports patient into the hospital utilizing appropriate PPE for patient care.
2. ED staff replaces the PPE utilized by the EMS team for the care of the patient they are delivering only. This is to include Gown, Gloves, Mask, Eye protection (as appropriate).
3. Extra PPE will not be provided to the EMS crew at any point without approval by EMS coordinator or House Supervisor.

*Illinois law requires that the hospital receiving the patient replaces 1 for 1 any supplies utilized for that patient's care pre-hospital.
