

# **\*\*PRACTICE CHANGE - Updated\*\***

## **VRE**

**March 22, 2020 1415**

- The first priority for SIH is to ensure all patients are provided safe care while maintaining a safe environment for all staff and visitors.
- Evidence-based practice supports no isolation is required. Several organizations across the nation support this practice.
- As an organization, we will be suspending our practice of isolating known or suspected VRE patients.
- Use Standard Precautions
